Databases & BI: SQL, PostgreSQL, MySQL, SQLite, ETL, Microsoft Power BI, DAX
Programming & Statistical Software: Python (pandas, NumPy), R, SAS, SPSS, Claude API
Automation & Microsoft 365: Microsoft Power Platform, Power Automate, Microsoft Lists, Advanced Excel
Tools: Git/GitHub, Jupyter Notebook, VS Code
Languages: English, Cantonese, Mandarin (fluent); French, Japanese (elementary)

Education & Certifications

Bachelor of Science in Statistics, Minor in Economics | Carleton University, Ottawa ON **June 2025**
Microsoft Certified: Power BI Data Analyst Associate (PL-300) **Expected Dec 2026**

Professional Experience

Izakaya Shingen | Bartender / Server **Sep 2022 – Present**
- Built a reporting pipeline by cleaning daily POS data in PostgreSQL, fixing duplicate entries and void-entry errors, and building a Power BI dashboard tracking sales by item, tips and voids by reason, cutting 4.5 hours of quarterly manual reporting
- Analyzed an A/B promotional test, delivering pricing recommendations that raised average drink order value by 10%
- Trained 5 new front-of-house staff and managed full front-of-house operations

Statistics Canada | Census Helpline Operator **Apr 2026 – Aug 2026**
- Designed and deployed an automated inquiry-tracking system with 30+ FAQ entries in Microsoft Lists and Power Automate for a 9-person team, cutting repeat questions and response times with zero missed inquiries
- Resolved 1,500+ public inquiries in full compliance with federal privacy and confidentiality legislation
- Improved data integrity by investigating and correcting 2,000+ dwelling discrepancies and accurately assigning outcome codes
- Led daily team meetings to review call-centre KPIs, and documented escalations in the internal case management system (iceBar) and the Census Knowledge Base

Motley Institute of Business & Technology | Business Development & Sales Intern **Oct 2023 – Feb 2024**
- Standardized client and outreach records using Excel Power Query and XLOOKUP, cutting weekly reporting time by ~2.5 hours
- Analyzed social media engagement data to identify enterprise-level client opportunities and refine outreach targeting
- Executed multichannel outreach campaigns across email, social media and direct contact, securing 2 new partnership inquiries
- Delivered 3+ tailored business proposals, resulting in 1 client meeting and 1 closed deal

Westcoast Naturals | Supply Chain Intern **May 2022 – Sep 2022**
- Reduced material procurement costs by ~15% by comparing pricing across 10+ suppliers and streamlining vendor tracking
- Automated stock counts & order sheets with Excel VBA macros, preventing inventory sync failures and the extra shipping fees
- Consolidated purchase requests across sales, lab and packing departments into one coordinated process, preventing material bottlenecks and production delays

Projects

Resume Tailoring and Scoring Tool | Python, Claude API
- Developed a Python web application using Claude API to score resume against job postings, tested on 20+ real postings
- Automated application tracking with Gmail filters for email labeling and Google Sheets status logging

HR Analytics: Workforce Insights | R
- Built R reports evaluating pay disparities across gender, department and position, helping HR teams spot workforce trends
- Applied correlation analysis to link lateness to turnover and lattice analysis to evaluate hiring acceptance rates
