Statistics graduate with a minor in Economics, with public-sector experience at Statistics Canada and internships in business development and supply chain. Builds Power BI dashboards, PostgreSQL databases, and Power Automate workflows that reduce manual reporting, and explains findings clearly to non-technical audiences. Communicates in English, Cantonese, and Mandarin.

SKILLS

Programming & Libraries: R, PostgreSQL, Python (NumPy, Pandas, SQLite), Java, MATLAB, HTML & CSS
Data Analytics & Visualization: Power BI, Jupyter Notebook
Software & Other Tools: Microsoft Office Suite (Excel, Outlook, Microsoft Lists, Power Automate), VS Code, GitHub/Git
Languages: English (Professional proficiency), Chinese: Cantonese, Mandarin (Native or bilingual proficiency), French, Japanese (Elementary proficiency)

PROFESSIONAL EXPERIENCE

Census Helpline Operator | Statistics Canada ***Apr 2026 – Aug 2026***

- Built a custom FAQ tracking system using Microsoft Lists and Power Automate to log and resolve team inquiries, automating break reminders and management alerts
- Handled 1,500+ resident telephone inquiries regarding census procedures and digital forms, ensuring full compliance with federal privacy legislation and operational protocols
- Maintained internal database integrity by investigating dwelling discrepancies, correcting address records, and logging outcome codes accurately
- Streamlined call escalations and administrative alignment by documenting interactions in iceBar, the Census Knowledge Base, and Microsoft Word, while leading daily team meetings to review KPIs
- Conducted outbound Chinese language support calls during low-volume periods and manually transcribed illegible handwritten questionnaires to expand census accessibility

Bartender / Server | Izakaya Shingen ***Sep 2022 – Present***

- Cleaned and structured raw POS sales data in PostgreSQL and connected it to a Power BI dashboard, eliminating manual quarterly reporting needs and giving ownership on-demand performance tracking
- Analyzed promotional data and shared actionable insights with ownership to guide menu and pricing decisions, contributing to a 10% increase in average drink order value
- Managed fast-paced front-of-house operations, including order taking, beverage preparation, food running, reservations, seating, and guest accommodations for dietary needs
- Supported restaurant management with point-of-sale (POS) system configuration, pricing updates, and employee records maintenance
- Coordinated smoothly with kitchen staff during peak hours and trained incoming front-of-house team members

Business Development & Sales Intern | Motley Institute of Business & Technology ***Oct 2023 – Feb 2024***

- Reorganized and standardized client and outreach records in Excel, improving data accuracy and reducing weekly reporting time by approximately 2.5 hours
- Conducted follow-up workflows across email, social media, and direct contact that secured 2 new partnership inquiries
- Analyzed sales and marketing engagement data to identify enterprise-level client opportunities and optimize outreach strategies
- Collaborated with senior staff to prepare and deliver 3+ tailored business proposals for prospective and existing clients, reporting progress directly to the CEO

May 2022 – Sep 2022

Supply Chain Intern | Westcoast Naturals

- Coordinated with 10+ active suppliers to compare pricing and streamline follow-up tracking, achieving an average 15% reduction in material procurement costs
- Tracked inventory levels, vendor data, and order metrics in Excel to reduce ordering errors and maintain supply availability during peak periods
- Prevented material bottlenecks and production delays by consolidating cross-departmental purchase requests and managing high-volume email coordination
- Assisted the purchasing manager with physical material receiving, picking, and inventory verification to support daily supply chain fulfillment

PROJECTS

Job Application Tracker | Power BI, Excel

- Built an analytics dashboard to track job search progress and identify key performance trends like a 33% response rate and 13-day average turnaround
- Analyzed historical data to highlight top in-demand skills (Python, SQL, Power BI) and optimize the application strategy

Resume Tailored and Score Tool | Python

- Developed a web application enabling users to compare professional profiles against target job postings for automated tracking and tailoring
- Integrated the Claude API to dynamically generate compatibility scores, alongside automated email labeling and Google Sheets status logging

HR Analytics: Workforce Insights | R

- Created visual reports to help HR teams identify workforce trends, evaluating pay disparities across gender, department, and position
- Uncovered key behavioral insights—such as using correlation analysis to link lateness to turnover and lattice analysis to evaluate hiring acceptance rates

EDUCATION

Bachelor of Science in Statistics, Minor in Economics
Carleton University, Ottawa, ON | Graduated June 2025
